## 2017 Professional Cattlemen's Bull Sale – Cattle with Something EXTRA!

*Dear Friends and Customers,*

*A little over 40 years ago the son of a cotton farmer found himself trying to find his place in the agricultural world. He too thought his life's work would be in cotton, but boll weevils led to closure of the family cotton gin and after earning his business degree at Berry College he entered the banking world. While banking was his source of income he still was a farmer at heart. The transition from row cropping to cattle was not easy and he was searching for a cattle breed that would work well in our hot summers yet would produce the beef quality that many desired. After reading about Brangus he boarded a plane on Christmas Eve 1975 to fly to Missouri to purchase his first Brangus cattle. These cattle were some of the first Brangus to come to North Georgia. These cattle worked well and helped allow us to sell bulls private treaty off the farm which were a big help to a part-time farmer raising three boys who had answered God's call for him to preach the gospel.*

*The preacher became a pastor. Being a father, working for Farm Credit, and pastoring proved to be too much to continue raising registered Brangus. While the love and admiration for Brangus remained, he predominately raised crossbred Brangus cattle for the next 20 years and was joined in this passion by his sons as they grew up and began to raise their families.*

*As we three brothers took a greater role in decision making, we began to put together a predominantly Brangus commercial herd of our own. We experimented with bulls from other breeds at times but always found ourselves coming back to "what works." The functional nature of the Brangus breed is essential to our profitability as a farm. Our primary source of bulls through the years has been the fine people at Salacoa Valley Farms owned by David Vaughan. His commitment to the breed and his willingness to stand behind his animals made that a great relationship. During our time of buying animals from Salacoa Valley, we met Ben Spitzer and his father, John Spitzer. Not believing in luck, we believe that meeting was providential! In time, our desire to continually improve our farm, was joined with a need for Spitzer Ranch in Fair Play, South Carolina, to develop a new Cooperator. So, in 2010 we resurrected the H+ brand and returned to the ranks of the registered Brangus breeders.*

*Ben later left Salacoa Valley and presented us with the opportunity to pasture some Spitzer Ranch cattle for a few years. During this time we bought some females from Salacoa Valley and Spitzer Ranch and began following the Spitzer Ranch genetic plan and consigning bulls in the Spitzer Ranch Sale. Two years ago, John and Patricia Spitzer approached us about purchasing their cow herd and we felt honored and thought it was an opportunity of a lifetime. We want to thank John, Patricia and Ben for their hard work and genetic selection; cattle like these were not developed in one breeding. They took generations of calculated breeding to proven sires and meticulous care to develop the herd to this point. We will continue the progress!*

*We also want to recognize our Dad, Michael Hunt, who set out over 40 years ago headed to Missouri on Christmas Eve not knowing it would bring us to where we are today, but I think he's glad it did! We certainly are! With great enthusiasm and much humility we are blessed to offer for public auction the product of the Spitzer genetic plan and the stewardship of the Hunt family! The care and planning behind these bulls is time tested and performance proven! These bulls will do the job!*

*Sincerely,*

*The Hunt Family*

ANNOUNCEMENTS MADE ON SALE DAY TAKE PRECEDENCE OVER ALL PREVIOUSLY REPORTED INFORMATION

## SALE WEEK SCHEDULE

### Friday, February 24, 2017

9:00 am .....Animals on Display

### Saturday, February 25, 2017

8:00 am .....Animals on Display

Noon ..... Complimentary Meal

1:00 pm ..... Sale begins

## SALE DAY PHONES

Wesley Hunt ..... 770-548-7950

Jamey Hunt ..... 678-986-4825

Seth Hunt ..... 770-548-1667

Michael Hunt ..... 770-877-2098

John Spitzer ..... 864-710-0257

Ben Spitzer ..... 864-723-3779

Andrew Conley, Auctioneer ..... 706-781-8656

Matt Hibberts ..... 404-597-7119

## TELO-AUCTION AVAILABLE

**NOTE: For any telephone bidding you must contact us in advance to register a bid number.**

If you will not be able to attend the sale, you will still be able to bid by way of a conference call hookup. Beginning at 12:45 p.m. EST on sale day, potential bidders should call:

**1-866-848-2216**

to join the conference call live from the sale.

Enter the passcode: **6318793025** followed by the # sign. There is no charge to the caller to be on the conference call hook-up.

## CLAIMS FOR ADJUSTMENTS

Claims for adjustment must be made in writing to the seller within 6 (six) months of the sale date. All settlements will be made with credit at a future sale and this will, in any and all cases, be deemed full satisfaction and settlement.

## LIABILITY

All persons attending this sale do so at their own risk. Neither Hunt's Brangus nor anyone connected with management of the sale assume liability, legally or otherwise, for safety of buildings or premises, or for behavior of animals.

## TRUCKING

While hauling is typically a responsibility of the buyer, we continue the following policies. FREE HAULING anywhere on bull purchases of \$12,000 (one or several). Additionally, we guarantee a maximum trucking cost of \$300 per bull within the states of GA, NC and SC if arrangements are made with us prior to the sale. For other states we will be glad to assist with transportation and will get your bull delivered as economically as possible.

## FREE HAULING ON BULLS TO:

South Carolina..... Spitzer Ranch, Fair Play, SC

## SALE HOTELS AND MOTELS

### La Quinta

150 Cracker Barrel Dr, Calhoun, GA 30701 ..... 706-629-2559

### Fairfield Inn

1002 Highway 53 SE, Calhoun, GA 30701 ..... 706-629-8002

### Country Inn & Suites

## 2017 Professional Cattlemen's Bull Sale – Cattle with Something EXTRA!

### RESERVE SALE POLICY

In order for us to offer you quality bulls at auction year after year, we must insure that we recover the costs of developing quality bulls. We pledge to offer you a quality animal in a fair auction environment. We do this in a straightforward manner by letting you know our base price up front.

All bulls will be offered for auction with a minimum sale price of \$2,500. The high bidder as determined by the auctioneer will be the purchaser of the bull. However, no bull offered in this sale will ever be offered for sale at less than the beginning bid price. If any bulls are not sold they will be available for \$2,700 immediately following the auction and will remain for sale at that price on our farm until sold private treaty.

### RETAINED-INTEREST BULLS

We reserve the right to retain a 50% revenue sharing semen interest on any bull sold. Bulls are in your possession and under your control for natural service and you get 100% of the salvage value. We will continue to own half interest in bulls for the purpose of collecting and marketing semen, as well as using semen in our herds. While it is unlikely large amounts of semen will be collected or sold for many bulls, we need that as an option on bulls sold. As a buyer and at your option, you can also have a 50% revenue sharing semen interest and participate in revenue from semen sales. We have developed a Bull Partnership Agreement spelling out further details. Buying a retained-interest bull obligates you to that agreement only for semen collection and sales. To avoid any misunderstandings, if you have any questions at all, please ask. If you chose not to be involved with semen sales, we still reserve the right to collect and market semen on any retained interest bull.

**Lots, 1, 2, 3 all sell with Hunt's Brangus retaining ½ ownership, buyer gets ½ ownership and full possession.**

***Bulls are cataloged by sale order and sell in sale order based on the highest Curve Bender Index (CBI).***

### GOLDEN RULE CUSTOMER SERVICE

*When you purchase an animal from our program you become part of us and have an option to become part of our future sales. We are committed to you as a customer and deliver service with each sale. You will automatically be updated with current EPDs on your bull purchases and the females sired by those bulls become candidates to return as part of our*

*Customer Commercial Brangus Female Sales. We pledge to conduct our business in a manner that demands providing only the best in genetics and services that make you a repeat customer. We definitely provide VALUE ADDED GENETICS and strive to provide VALUE ADDED SERVICE.*

### CALVING-EASE BULLS

Over the years we have become more and more conservative on which bulls get **flagged as "Calving-Ease Bulls."** We have adopted the philosophy that it is better for us to have stricter guidelines than for you to be sorry at calving time. Obviously there are no guarantees for preventing difficult births in heifers.

Even the most proven "Calving-Ease Bulls" of any breed will sire a large calf every so often. However, this information is meant to serve as a guide for managing risk of calving difficulty in your first-calf females. Our goal is to help you eliminate heifer calving problems to the best of our ability.

REMEMBER: Compare Brangus to Brangus – No across-breed EPD comparisons can be made! Bulls indicated by the calving-ease flag symbol in their data block are considered to be low-risk bulls for calving difficulty.

**BUT, let's get real on calving ease!** Our "calving-ease bulls" are meant to be used to breed virgin heifers such that they will have little or no calving problems with their first calf. The other bulls in our catalog are very appropriate for use on cows that have already had at least one calf. There are almost no bulls in the entire Brangus breed that cannot be used on mature cows and have no calving difficulties. In fact, because the correlation with size at birth and growth is extremely high, you would be losing growth (and weaning weight) if you use our designated "calving-ease bulls" on mature cows.

**In general, always use our bulls flagged as "Calving-Ease Bulls" on virgin heifers for their first calf and use the other bulls on any mature cows in your herd. On the other hand, a "calving-ease bull" to breed virgin heifers can be a God send.**

## 2017 Professional Cattlemen's Bull Sale – Cattle with Something EXTRA!

Bulls designated with the "Calving-ease Flag" are felt to be Low-Risk Bulls for calving difficulty and are suitable for use on first-calf females.

1. Calving Ease Direct EPD – is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease which a sire's calves will be born when he is bred to first-calf heifers.
2. Birth weight EPD – predicts calf size and calving ease.
3. Weaning weight EPD – predicts preweaning growth potential.
4. Yearling weight EPD – predicts overall growth potential and post-weaning gain.
5. Milk EPD – predicts the maternal contribution a bull passes to his daughters for milk production and mothering ability.
6. Total maternal EPD – predicts the overall weaning weight of calves from daughters of a bull due to growth potential as well as milk production and mothering ability.
7. Calving Ease Maternal – is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.
8. Scrotal circumference EPD – predicts testicle size.
9. Ribeye area EPD – predicts muscling.
10. Percent intramuscular fat EPD – predicts marbling and quality grade.
11. Fat EPD – predicts external fat thickness and yield grade.
12. To make it easier to evaluate EPDs, the percentile ranking is shown below each individual EPD. This is a great way to understand where the individual ranks in the breed for that particular EPD. For example, where it shows "10%," this means that particular EPD value is in the highest, or TOP 10%, of all non-parent bulls in the entire breed. (A 10% for BW, however, means lowest, or lightest.)
13. Actual birth weight within 24 hours of birth.
14. Weaning weight adjusted to 205 days of age and for age of dam.
15. Ranking of individual 205-day adjusted weaning weight in relation to average adjusted weaning weight of weaning contemporary group of this calf. The contemporary group has an average ratio of 100.
16. Average daily gain (pounds per day) during Hunt's Brangus' 140-day performance growth test.
17. Lifetime weight per day of age (actual weight divided by days of age) at the end of Hunt's Brangus' 140-day performance growth test.
18. Ranking of individual WDA in relation to average WDA of the entire test group, which has an average ratio of 100.
19. Yearling weight adjusted to 365 days of age and for age of dam.
20. Ranking of individual adjusted 365-day yearling weight in relation to the average adjusted yearling weight of yearling contemporary group. The contemporary group has an average ratio of 100.
21. Yearling frame score adjusted to 365-days of age.
22. Yearling scrotal circumference (testicle size measured in centimeters) adjusted to 365-days of age.
23. Curve Bender Index (CBI). The CBI is an index which combines values for low birth weight EPD and high yearling weight EPD into one value. This Index has a highest achievable numeric value of 148 and goes down from there. Bulls with a higher numeric value for CBI would be expected to sire calves with lighter birth weights and yet heavier weaning and yearling weights.

25. Ultrasound measurement of rib eye area, which is indicative of muscling and positively correlated with retail beef.
26. Ranking of individual adjusted 365-day rib eye area in relation to the average adjusted rib eye area of the yearling contemporary group. The contemporary group has an average ratio of 100.
27. Ultrasound measurement of percent intramuscular fat or marbling in the ribeye muscle which is a predictor of quality grade.
28. Ranking of individual adjusted 365-day percent intramuscular fat in relation to the average adjusted percent intramuscular fat of the yearling contemporary group. The contemporary group has an average ratio of 100.
29. Ultrasound measurement of fat thickness at the 12th rib, which is a good indicator of yield grade.
30. Ranking of individual adjusted fat thickness at the 12th rib in relation to the average adjusted fat thickness at the 12th rib of the yearling contemporary group. The contemporary group has an average ratio of 100.
31. The tattoo or private herd number (PHN) of the dam of this calf.
32. Age of dam at time of birth of this calf.
33. Number of calves born to dam
34. Average actual birth weight of dam's progeny.
35. Average birth weight ratio of dam's progeny compared within contemporary groups.
36. Average weaning weight ratio of dam's progeny compared within contemporary groups.
37. Average yearling weight ratio of dam's progeny compared within contemporary groups.
38. Average ultrasound ribeye area of dam's bull calves.
39. Average ultrasound % intermuscular fat of dam's bull calves.
40. Average ultrasound fat thickness of dam's bull calves.

NOTE: All ultrasound scans (25-30 and 38-40) are adjusted to 365 days of age.

**For your convenience,  
non-parent breed average EPDs are on each page.**

“To country people cows are mild,  
And flee from any stick they throw;

But I'm a timid town-bred child,  
And all the cattle seem to know.”

– T.S. Eliot

“Crossbreeding might result in relatively small amounts of heterosis for a given trait, but these effects tend to accumulate to produce large increases in overall productivity... but to optimize the benefits, a crossbreeding program should be implemented.”

– Darrh Bullock

“In general, animals that are crosses of unrelated breeds such as Angus and Brahman, exhibit higher levels of heterosis, due to heterozygosity, than do crosses of more genetically similar breeds such as a cross of Angus and Hereford.”

– Bob Weaver,  
Kansas State University

BEEF CATTLE HERD HEALTH

We and our cooperators take very seriously our commitment to provide you with a healthy animal and to minimize the risk of introducing disease into your cow herd. The following chart depicts our comprehensive, intensive and proactive approach to disease control. It indicates when we administer vaccines, vitamins, parasite control and all testing procedures. Our cooperators follow an identical protocol. We are **Tuberculosis Accredited** {Hunt's #381} and **Brucellosis Certified** {Hunt's #381}.

The Hunt's Brangus has been testing for Johne's Disease by fecal culture since 2010 with all cows testing negative each time and they are working towards designation as a Test-Negative Herd. Additionally, every bull in the sale as well as their sisters back home have been "ear notched" and guaranteed to be **Negative for PI-BVD** by IDEXX Antigen Capture Elisa (ACE).

**Health Papers (Certificate of Veterinary Inspection) will be provided at no charge to buyers in order to allow shipment to Anywhere, USA.**

## The science.

The Purina® All Seasons™ Cattle Nutrition Program delivers customizable solutions that have been proven successful on our farm in Missouri, as well as all across the country in over 1,800 field trials. We even have a 120 head Black Baldy herd and calves, which are used to develop and evaluate supplementation programs that enhance forage use and improve cow productivity. By matching the correct solutions for a cattleman's available forage, cattle are assured to receive the right nutrition and perform to their highest potential. From the cow to the finished steer, this program supports healthy cattle and allows them to achieve greatness at every life stage.

## SPECIAL THANKS ...

We would like to thank our cooperators, neighbors and friends, Matt Hibberts, owner of Plainview Farms, and Barry McEntire of Triple B Ranch, for their support in this inaugural sale. There is satisfaction in doing worthwhile things the right way with people that share that commitment.

We also want to thank Dr. David Loughridge and Dr. Brannon Rickman of Murray County Veterinary Services for helping us steward the health of our cows and bulls. Their commitment to their work makes our commitment to our animals and to our customers achievable.

Ben Spitzer has been our friend and advisor for the past seven years and is responsible for us having the opportunity to offer you these bulls. We wouldn't be here today without his help. He has been a steady source of listening ears and good advice when needed. His videos of the bulls look great as well!

We are excited to introduce our auctioneer, Andrew Conley, to our customers. Andrew is no stranger to cattle

producers throughout the Southeast. He has managed large cattle operations in Georgia and is well suited to analyze genetic depth and phenotype in Brangus cattle. Since 2005, he has been calling sales across the United States working with several different breeds. He has been invaluable to us as a guide in navigating all the firsts in sale production. We chose to manage this sale on our own but we have had an advisor who knows what's right and what works as we have taken each step.

Thanks again to Doc and Patricia Spitzer who trusted us as cooperators and then as caretakers of a genetic legacy that they carefully designed and poured their hearts into. We are glad to be carrying on the traditions and commitment behind these animals!

Most importantly, we are blessed to be able to live, work and worship our Lord and Savior, Jesus Christ, as we raise these productive and beautiful animals for you!

Soli Deo Gloria!  
The Hunts
